

STABLE & ZEN GOLF INTRODUCE SUPERYACHT GOLF AT MONACO 2024

STABLE ZEN GOLF PARTNERSHIP

Reveals Spectacular On-board Golf Technology at Stand #DS36 Monaco Yacht Show.

The STABLE ZEN GOLF Stage is the world's first self-levelling golf platform for the superyacht. The unique technology creates an immersive environment that replicates the real game. Thanks to the STABLE ZEN GOLF partnership, owners and charter customers can now enjoy full swing and putting in perfectly stable conditions.

"The STABLE ZEN GOLF Stage enables realistic full-swing golf on-board without the waves spoiling play" said Zen CEO Nick Middleton.

"We are thrilled to elevate the on-board golfing experience by integrating our real-time stabilization technology with Zen Green Stage" said Rune Eriksen, CSO & Partner of STABLE.

"Now, dedicated golf enthusiasts can hone their skills regardless of sea conditions,"

Middleton continued; *"Very few people are totally immune to the effects of sea sickness. The STABLE ZEN GOLF Stage opens up new golf experiences and also provides a safe zone to recuperate."*

"The new technology platform empowers plans to introduce a real-time golf format we call 'Play Live Golf'. This enables users to recreate gradients from any golf course on shore with their STABLE ZEN GOLF Stage and Green Stage moving floors. You will be able to play along with live tournaments in an ultra-realistic environment!"

About Zen Green Stage

www.zen.golf | [@zengreenstage](https://twitter.com/zengreenstage)

Zen Green Stage and Zen Swing Stage are golf's most accurate and reliable moving floors. We recreate the golf course indoors, ideal for capturing new performance data suitable for elite training and enhanced golf sim experience.

Golf's leading launch monitors and simulators, putting technologies and force / balance plate systems are brought to life on Zen's precisely-adjustable gradients.

Our customers in 25 countries include the PGAs of America, GB & Ireland, Australia and Germany; many leading major venues and universities; PGA Tour and DP World Tour players and their coaches; national governing bodies; serious golfers with home studios; and a wide range of different golf clubs, golf academies, golf coaching facilities and commercial entertainment venues.

The company is based in Sheffield, UK, with a network of Zen Certified Installers worldwide.

About STABLE

www.stableonboard.com

STABLE (est. 2002) is the number one supplier of onboard stabilization platforms, using technology originally developed for use in active heavy-compensated cranes for the offshore industry.

STABLE's platform neutralizes a vessel's roll and pitch motions, which are calculated by means of sensor signals, resulting in the platform being automatically adjusted by computer-controlled actuators.

STABLE has proved itself by developing one of the most demanding applications in terms of responsiveness and accuracy: the STABLE Billiard, which has been installed on a large number of cruise ships and superyachts.
